EXECUTIVE SUMMARY

Detail-oriented Data Analyst and Business Analytics Specialist with experience transforming financial, operational, and performance data into actionable insights that support business decision-making. Skilled in SQL, Python, Excel, Power BI, and Tableau, with hands-on experience in financial reporting, data validation, dashboard development, performance analysis, and workflow automation.

Experienced in analysing large datasets, improving reporting accuracy, automating recurring processes, and translating business questions into clear, decision-ready insights. Also experienced in operational coordination, CRM systems, process documentation, and cross-functional collaboration. Currently pursuing a Bachelor of Science in Data Science, with a strong interest in using data and analytics to improve business and financial decisions.

PROFESSIONAL EXPERIENCE

Melanin Tax Solutions USA - Remote

Operations & Executive Assistant

May 2026 – September 2026

- Improved day-to-day business operations by coordinating executive priorities, client communications, documentation, and follow-up workflows.
- Optimized CRM processes using HubSpot and GoHighLevel, improving client data accuracy and follow-up visibility.
- Designed and implemented operational workflows in ClickUp and Notion, creating better task visibility and team accountability.
- Developed SOPs and process documentation that standardized recurring processes and supported more scalable operations.
- Supported leadership decision-making through business research, reporting, workflow analysis, and operational recommendations.
- Leveraged AI-powered tools to streamline documentation, meeting summaries, content development, and administrative workflows.
- Coordinated multiple projects remotely while maintaining accuracy, confidentiality, and timely execution.

Mwananchi Credit Ltd. Nairobi, Kenya

Data Analyst

March 2025 – March 2026

- Automated recurring financial and performance reporting, reducing manual workload by 31% and accelerating reporting cycles.
- Built and maintained interactive Power BI dashboards covering repayment trends, portfolio performance, and customer segmentation, improving decision visibility by 23%.
- Analysed large financial and operational datasets to identify trends and generate insights for Finance, HR, and IT teams.
- Improved reporting accuracy to 97% through systematic data validation, reconciliation, duplicate removal, and quality checks.
- Streamlined payroll and HR data preparation, ensuring accurate and structured inputs for internal financial processes.
- Translated complex datasets into structured analytical reports and insights used to support leadership planning and business decisions.

ALX Africa Hybrid

Program Delivery – Learning Programs (Cybersecurity)

September 2025 – May 2026

- Analysed learner engagement, attendance, and retention data to identify behavioural patterns, performance trends, and potential risk factors.
- Produced weekly data-driven insight reports that supported programme execution, learner experience, and retention initiatives.
- Mapped learner journeys and identified drop-off points, supporting targeted intervention planning.
- Combined quantitative data with qualitative feedback to produce actionable insights for programme and product teams.

ALX Africa Remote

Pathway Reviewer (Part-Time)

May 2025 – September 2025

- Improved project quality and conceptual understanding by 19% through structured assessment and feedback.
- Identified recurring learning gaps across cohorts and contributed insights that supported improvements to course guidance.
- Maintained a 100% on-time feedback delivery rate while contributing to curriculum improvement discussions.

Pamoja Forum Remote

Operations & Administrative Support Assistant

September 2024 – March 2025

- Improved operational coordination by maintaining tracking systems and supporting cross-team workflows.
- Maintained accurate CRM and participant tracking systems, improving visibility of communications and ongoing activities.
- Supported event planning, coordination, and administrative execution for remote and community-focused programmes.

KEY PROJECTS

Maji Ndogo Water Infrastructure & Access Analysis | SQL, Power BI

Analysed water access and infrastructure data using SQL to identify service delivery gaps and visualize findings in Power BI.

Remote Work & Healthcare Analysis | Data Analysis, Visualization

Explored remote work and healthcare data to identify trends, relationships, and insights relevant to workforce and healthcare decisions.

CORE COMPETENCIES
